

# ArcticPRO® RHS®980C R134a Refrigerant Handling System

The OEM version of the RHS®980 is here...same rugged platform as the RHS®980 while incorporating all of the features required for OEM style A/C services.

**TechALERT®**  
COMPATIBLE

## OEM Style Feature and Function Upgrades

- Standard integral printer
- Standard temperature probes
- High pressure leak detect function
- Password use protection
- Micron level measurement during evacuation process
- Ambient temperature & humidity
- Self check/diagnostic function
- Dual vacuum process service modes
- Manual or automatic oil/dye injection
- Liquid refrigerant flush function
- Optional integral refrigerant identifier
- High voltage compatibility option

## 48-Hour Service Turnaround

- Average service turnaround is 48 hours when end-user assists in diagnostic/repair process.
- 95% success average in machine resuming operation after first call to RTI tech support.

## Best Performance

- Best real-world refrigerant recovery & charge time average.
- Best real-world refrigerant charge accuracy.
- Best real-world vehicle A/C system recovery percentage.

## Future Function Upgradability

- Designed for future function upgradability.
- Ensures up-to-date machine functionality even with mature equipment.

## TechALERT® – Remote Process Monitoring

- Optional TechALERT® sends wireless signal to remote pager carried by service technician.
- Remote provides technician with periodic process status for RHS980C.
- Technician is no longer required to physically attend the machine.
