

RTI Technologies to raise the bar at 2007 AAPEX with the introduction of several new products.

YORK, PA--(BUSINESS WIRE)—August 23, 2007—RTI Technologies, Inc. has just announced the public unveiling of its SAE J2788 compliant air conditioning service machine will occur at the 2007 AAPEX show in Las Vegas at the end of October. RTI's new machine, the **RHS®980**, will fully conform to the new SAE J2788 standard and has been designed with the service technician in mind. The **980** incorporates all of the beneficial attributes which characterize RTI air conditioning service equipment into a new package to enhance shop productivity and increase profits. **Most importantly, the RHS®980 includes exclusive, yet-to-be disclosed technology that will totally revolutionize the way automobile service shops manage their under-hood fluid maintenance services.**

"We've integrated a host of critically important features into the **980** and want to introduce them to the automotive aftermarket industry in a very meaningful and memorable way. We believe the **RHS®980** is going to steal the show because it will establish a new standard of operation for automotive service equipment," stated Jeff Murphy, President and CEO of RTI Technologies.

"Service shops considering the purchase of new A/C service equipment will definitely want to take advantage of the new features and technician productivity enhancement technology the RHS®980 has to offer," explained Murphy.

Production shipments of the **RHS®980** begin immediately following the AAPEX show.

The seven most significant benefits of the RHS®980 include:

Ease of use...the **980** incorporates several new and exclusive features that technicians will find very friendly to operate!

Dependability...the **980** is designed and manufactured to provide the best "out-of-the-box" reliability!

Cycle time...the **980's** standard dual stage, 7.0 CFM vacuum pump contributes to the fastest operation cycle time in the business!

Serviceability...in leveraging RTI's tradition of building the most serviceable equipment, the **980** has bested the best!

Robustness...the **980** follows the footsteps of its RTI predecessors by utilizing the most consistently reliable components available in our industry!

RTI Technologies, Inc.

Technician productivity...having a technician “tied” to a machine during its entire service cycle means lost man-productivity. RTI provides the solution by offering exclusive technician productivity enhancement technology on its **980** unit.

Technical support...live support based at the factory in York, PA. We offer same day call-backs, lifetime toll-free tech support and nationwide service coverage...all RTI industry exclusives!

See RTI’s RHS[®]980 and the full assortment of RTI products and services including the ever-popular NitroPRO[®] nitrogen tire filling system at the 2007 AAPEX show, booth number 5424. In addition, both NitroPRO[®] and the RHS[®]980 can be seen at the 2007 SEMA show, booth number 35035, which runs concurrently with AAPEX in Las Vegas.

RHS[®]980 Preliminary Technical Specifications

ELECTRICAL	120VAC – 60HZ – 12 AMP 230VAC – 50HZ – 6 AMP (OPTIONAL)
OPERATING RANGES	32deg – 120deg (F)
SCALE ACCURACY	J2788 COMPLIANT
RECOVERY ACCURACY	J2788 COMPLIANT
HOSES	9 FT
COMPRESSOR	3/8HP – 0.8KW, pressure protected, balanced start-up, oiled, hermetically sealed
COOLING FAN	Industrial-duty
VACUUM PUMP	7.0 CFM, dual stage, 29.9 InHg
CHARGING CYLINDER	30 LB DOT
PROCESS TIME	average less than 10 min, R/R/R

About RTI Technologies, Inc.

RTI Technologies, Inc. located in York, PA, has been a leading designer, manufacturer and marketer of a broad range of automotive aftermarket service equipment for nearly two decades.
